

Muhammad Usman Saleem

Software QA Engineer | Manual & Automation Testing | API & Database Testing

+966 534843925 | sqa.usmansaleem@gmail.com | [Usman Saleem LinkedIn](#) | Riyadh, Saudi Arabia | Transferable Iqama | Available Immediately

PROFESSIONAL SUMMARY

Software QA Engineer with 4+ years of experience testing web, mobile, SaaS, fintech, and enterprise applications in Agile and CI/CD environments. Strong expertise in manual and automation testing, REST API validation, PostgreSQL/SQL database testing, integration, regression, UAT, E2E, and release validation. Experienced in shift-left and risk-based testing, defect prevention, data integrity validation, and end-to-end business workflow testing, with hands-on experience in Cypress and Playwright automation. Proven ability to lead QA initiatives, mentor QA engineers, collaborate with cross-functional teams, and support reliable, on-time releases.

SKILLS

Testing Skills: Manual Testing, Functional, Integration, Regression, Smoke, Sanity, Exploratory, End-to-End (E2E), UAT, Cross-Browser Testing, Shift-Left Testing

Automation & API: Cypress (JavaScript), Playwright, Test Automation, Page Object Model (POM), Postman, REST API Testing, Schema Validation, Status Code Validation, Authentication & Authorization Testing, Swagger

Data & Backend: Database Testing (PostgreSQL), SQL Validation, Data Integrity Validation, Application Log Analysis, Browser DevTools

Tools & Methodologies: Agile (Scrum, Kanban), SDLC, STLC, JIRA, ClickUp, TestRail, Confluence, Git, DBeaver

QA Documentation & Reporting: Test Planning, Test Strategy, Requirement Analysis, Test Scenarios and Test Cases Design & Execution, Acceptance Criteria Review & Validation, Defect Reporting and Tracking, Regression Suite Maintenance, RTM, Quality Metrics

Applications & Domains: Web Applications, SaaS Applications, Mobile Applications (Android & iOS), Desktop Applications, Fintech & Financial Systems, Digital Lending & Loan Management, KYC & Customer Onboarding, Repayment & Financial Workflows,

AI & Emerging Tech: AI-Assisted Testing, AI-Based Test Case Generation, Defect Analysis, QA Documentation Support, AI Feature Validation, Prompt-Based Test Design

Soft Skills: Analytical Thinking, Stakeholder Communication, Cross-Functional Collaboration, Time Management, Continuous Learning

PROFESSIONAL DEVELOPMENT & TECHNICAL UPSKILLING

Riyadh, KSA

10/2025 – Present

- Relocated to Saudi Arabia while continuing professional development and pursuing Software QA Engineering opportunities in the Saudi technology market.
- Built independent Cypress and Playwright automation projects using JavaScript, designing reusable Page Object Model (POM) and data-driven frameworks for end-to-end UI workflows, while also developing automated tests for REST APIs covering requests and responses, authentication, status codes, and end-to-end API workflows.
- Currently expanding hands-on knowledge of Jenkins and CI/CD pipelines, focusing on integrating automated UI and API test execution into continuous testing workflows.

WORK EXPERIENCE

Manafa Technologies, QA Engineer, Lahore, Pakistan

04/2025 – 10/2025

Manafa is a Saudi fintech company providing digital lending and financial solutions to SMEs.

Key Achievements:

- Contributed to 10+ fintech releases through end-to-end testing of web and mobile applications across the full lending lifecycle, with no critical defects reported by end users post-release.
- Applied shift-left testing by reviewing BRDs, user stories, and Zeplin design specifications with Business Analysts before development starts, identifying 20+ requirement and design gaps that reduced downstream rework and improved release quality.
- Contributed to test planning and test strategy for Agile sprint releases; designed and executed 250+ test scenarios and test cases in TestRail, maintained RTM documentation to ensure requirement-to-test coverage.
- Performed functional, integration, regression, and UAT testing across SAMA-regulated lending workflows, including KYC, user onboarding, loan generation, repayment, and reporting modules, validating end-to-end business processes and supporting compliance with financial regulations.
- Validated 100+ API scenarios using Postman across major HTTP methods, covering authentication, loan processing, repayment, and reporting workflows; performed PostgreSQL database validation using SQL queries and Teleport to verify data integrity and consistency across UI, API, and database layers.
- Identified, logged, and tracked 80+ defects across critical lending workflows in JIRA, documenting clear reproduction steps and technical evidence; analyzed application logs and Browser DevTools to investigate failures and collaborated with developers through retesting and defect closure.

- Contributed to the automation team by developing and maintaining Cypress-based regression tests within an existing Page Object Model (POM) framework, reducing regression suite execution time by 30%.
- Supported release readiness across 10+ Agile sprints by participating in sprint planning, daily stand-ups, and retrospectives, providing QA sign-off and testing metrics to stakeholders, and contributing to consistent on-time delivery.

Qualitx, SQA Engineer, Lahore, Pakistan

06/2022 – 04/2025

Qualitx is a software testing and QA services company delivering quality assurance solutions for web, mobile, and desktop applications across multiple industries.

Key Achievements:

- Delivered QA across 30+ releases and 10+ SaaS, healthcare, and enterprise web, mobile and desktop applications, consistently meeting sprint and release deadlines.
- Led and mentored a team of 5 QA engineers, reviewing test cases and guiding test coverage, test design, and QA practices to strengthen overall test quality and reduce defect leakage.
- Enhanced test coverage by designing structured test cases from Figma designs and functional specifications, proactively identifying UI inconsistencies and requirement gaps before development.
- Developed and maintained reusable Cypress automation components to support regression testing and reduce manual testing effort across sprint cycles.
- Identified, logged, and tracked 100+ defects across multiple product features through functional, regression, smoke, and integration testing, using JIRA and ClickUp for defect prioritization and resolution tracking.
- Validated 100+ REST API scenarios using Postman across user management, authentication, payments, and reporting modules, verifying request/response schemas, status codes, and error handling to ensure backend reliability across core application workflows.
- Performed backend data validation using SQL queries across multiple modules, verifying data integrity, accuracy, and consistency between UI actions and database records.
- Served as the primary QA point of contact for stakeholders during UAT, coordinating blocker resolution and validating acceptance criteria before release sign-off to support smooth and timely releases.

EDUCATION

University of Sargodha — Pakistan

Bachelor of Science in Information Technology | Sep 2017 – Jul 2021

CERTIFICATIONS

- ISTQB Foundation Level – In Progress
- API Testing – Postman Academy
- Cypress: Web Automation Testing – Udemy
- QA Fundamentals – 10Pearls University
- JavaScript – Udacity
- Database Management System – Great Learning

LANGUAGES

- English – Full Professional Proficiency
